DHANUSH PRABU

Full-Stack Developer | React.js | Django REST Framework | Chennai, India

dhanushprabu23@gmail.com | +91-8098634907 | linkedin.com/in/dhanushprabu23 | github.com/dhanush-prabu

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 1+ years of experience building production-grade web applications using React.js, Python, Django REST Framework, and PostgreSQL. Skilled across the full SDLC, including client requirement gathering, RESTful API design, database design, testing, and AWS deployment. Delivered multi-tenant CRM, ERP, HMS, and billing systems currently live with real clients. Strong foundation in DSA, OOP, and Agile/Scrum delivery.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, Kotlin, TypeScript (learning)

Front-End: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Redux/Context API, Vite, REST API Integration, UI Component Development

Back-End: Python, Django, Django REST Framework, Node.js, Express.js, RESTful API Development, WebSockets (Django Channels), JWT Authentication, Role-Based Access Control (RBAC), Multi-Tenant Architecture, Microservices Concepts

Databases: PostgreSQL, MySQL (basic), SQLite, MongoDB, Database Design, ORM (Django ORM), Query Optimization

Cloud & DevOps: AWS (EC2, S3), Docker (basic), Git, GitHub, GitHub Actions (basic CI/CD), Linux, Deployment & Release Management

Testing & Practices: Unit Testing, API Testing (Postman), Code Reviews, Client Communication, Team Leadership, Agile/Scrum, SDLC

Core CS: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), System Design Fundamentals, API Design, Authentication & Authorization

PROFESSIONAL EXPERIENCE

Software Developer (Full-Stack) | Orbitz IT Solution, Chennai *Jan 2026 – Present*

- Contributed as a core full-stack developer across Orbitz's product suite, including OrbCRM, OrbERP, OrbHMS (Hospital Management System), and Orbill (Billing), delivering major features that are currently live and in active use by multiple clients.
- Designed and developed core modules of OrbCRM, a multi-tenant SaaS CRM built from scratch using React.js and Django REST Framework, implementing role-based access control (RBAC), tenant-level data isolation, and real-time business workflows.
- Delivered OrbERP modules covering inventory management, reporting, and operational workflows, and contributed to OrbHMS covering patient records, billing, and reporting workflows for healthcare clients, translating requirements gathered directly in client meetings into production-ready features.
- Developed Orbill, a client-facing billing application: designed billing screens and reporting modules, and implemented business-defined billing rules through RESTful APIs, improving billing accuracy and reducing manual work for client staff.
- Independently built and deployed 6+ full-stack client websites and platforms, including marketing sites, e-commerce, and classifieds, using React.js and Django REST Framework, live and serving real traffic.
- Contributed to the migration of a legacy .NET billing system to a modern React + Django REST stack, ensuring 100% functional parity while improving usability and maintainability; collaborated with QA and product teams to ship production releases.
- Currently lead a team of 5 developers across 2 concurrent projects, coordinating task delegation, conducting code reviews, and ensuring on-time delivery, in addition to Git/GitHub version control and branch management across all repositories.

Freelance Technical Content Developer | PrepBytes (Remote) *Feb 2025 – Jan 2026*

- Authored technical articles on DSA, Python, Java, and back-end fundamentals; wrote and tested every code example hands-on to guarantee correctness for placement and competitive-programming learners.
- Collaborated with the editorial team to break down complex computer science concepts into clear, beginner-friendly explanations across multiple difficulty levels, consistently meeting all content delivery deadlines.

Full-Stack Developer Intern | Zidio Development (Remote) *Apr 2024 – Jul 2024*

- Built and enhanced web application features using React.js and REST APIs in an Agile team; integrated front-end/back-end data flow, participated in sprint planning and code reviews, and performed manual/edge-case testing before each release.

PROJECTS

DataLens – Android WiFi Data Usage Tracker | *Kotlin, Jetpack Compose, Navigation3, Coroutines, AlarmManager*

- Built a native Android app using Kotlin and Jetpack Compose to track per-app WiFi data usage via NetworkStatsManager, featuring timeframe filtering, real-time search, and a live-updating home-screen widget refreshed via AlarmManager and coroutines.
- Implemented per-app and overall monthly detail screens with day-by-day bar charts and calendar-month navigation, backed by a custom NetworkStatsManager day-bucketing algorithm.

SpendWise – Personal Finance & Expense Tracker | *React, Django REST Framework, PostgreSQL, JWT, Chart.js*

- Engineered a multi-user expense management platform with strict per-user data isolation, category-wise analytics dashboards using Chart.js, and a Django REST back-end with structured validation and consistent API error handling.

EDUCATION

B.Tech in Information Technology *Graduated 2023*

SRM Valliammai Engineering College, Chennai CGPA: 8.2/10
